D.O.No.T.19011/25/2019-Nut.&IDD
(FTS No.8019804)

September 24, 2019

Dear Shri Jai Ram Thakur ji,

Iodine is an essential micronutrient required daily for proper health at all life stages. Deficiency of Iodine can result in a wide spectrum of Iodine Deficiency Disorders (IDDs) such as physical & mental retardation, still-births, perinatal deaths, congenital abnormalities, cretinism and various types of Goitre. Majority of these IDDs are permanent and irreversible but preventable. Iodine Deficiency can be easily prevented through daily consumption of adequately Iodized salt.

2. 21st October is observed every year as 'Global Iodine Deficiency Disorders Prevention Day' to raise awareness on this issue.

3. I would request you to issue instructions to all the concerned Departments under your Government, such as Health, Civil Supplies, Education, Women and Child Development and Panchayati Raj Institutions, to join hands in observing this day through a variety of activities, viz. seminars, workshops, health education campaigns etc. Detailed guidelines in this regard have already been issued separately by this Ministry to all the States/UTs.

Contd. On P.2.

Government of India

-2-

4. I am confident that under your esteemed leadership, the 'Global Iodine Deficiency Disorders Prevention Day - 2019' would be befittingly observed to disseminate effectively the message of regular consumption of adequately iodized salt in order to prevent and control the Iodine Deficiency Disorders.

With regards,

Yours sincerely,
